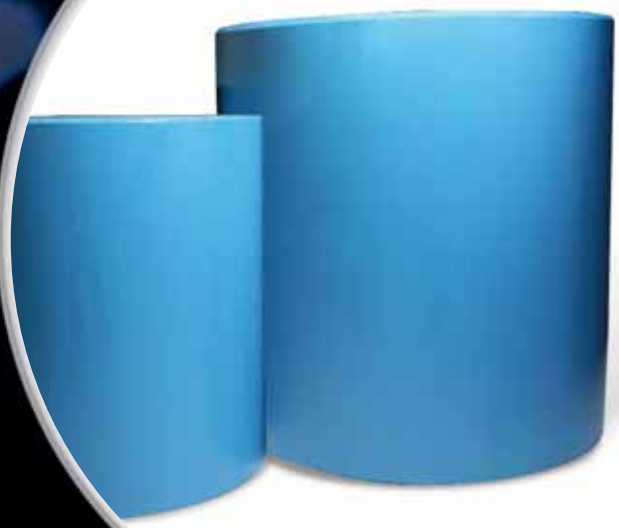
NEW PRODUCT SHOWCASE



Machined Stop, Repair and Tapped Couplings for C900 Pressure Pipe

Make repairs or changes to your existing municipal water piping systems quickly and easily with Machined Stop, Repair and Tapped Couplings from IPEX Inc. Each coupling is manufactured from thickened PVC pipe stock and features a profile that is precision-machined. All couplings are hydrostatically tested to 800 psi to ensure a bottle tight joint everytime.

Machined Stop, Repair and Tapped Couplings meet AWWA C900 and CSA B137.3 standards and feature:

- A thickened lip at each end, making them easier to push onto the host pipe
- A robust, solid, one-piece design for added strength
- Comes complete with gaskets saving time and money
- Available in 10" and 12" DR14 sizes

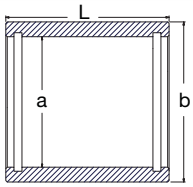
Tapped Couplings are ideal replacements for service saddles or direct tapping.

AWWA MEMBER B137.3 1285

- **Thickened Lip on Each End**
- **Robust One Piece Design**
- **Available Sizes: 10" & 12" DR14**

REPAIR COUPLING

Size	Length (L)		ID (a)		OD (b)	
	in	mm	in	mm	in	mm
10"	14	356	11.21	285	13.75	349
12"	16	406	13.29	338	16.25	413



STOP COUPLING

Size	Length (L)		ID (a)		OD (b)		Center Stop (c)		ID at Center Stop (d)	
	in	mm	in	mm	in	mm	in	mm	in	mm
